

# Alien Spaceship

## What you need:

- Paper plate
- Pencils/textas
- Paper
- Scissors
- Glue/tape

## What to do:

1. Fold the paper plate in half. Draw a spaceship design on the plate. The curved edge of the plate will sit on the table and the spaceship will rock when you touch it.
2. On paper, draw an alien. I used my hand print and turned it into an alien. Cut this out and stick onto the spaceship so the alien is on the top of the ship. I made mine look like the alien was looking out of a window.

Show us what you have made on the [Kids Creations Gallery](#).
