

PAPER PLATE JACK O'LANTERN

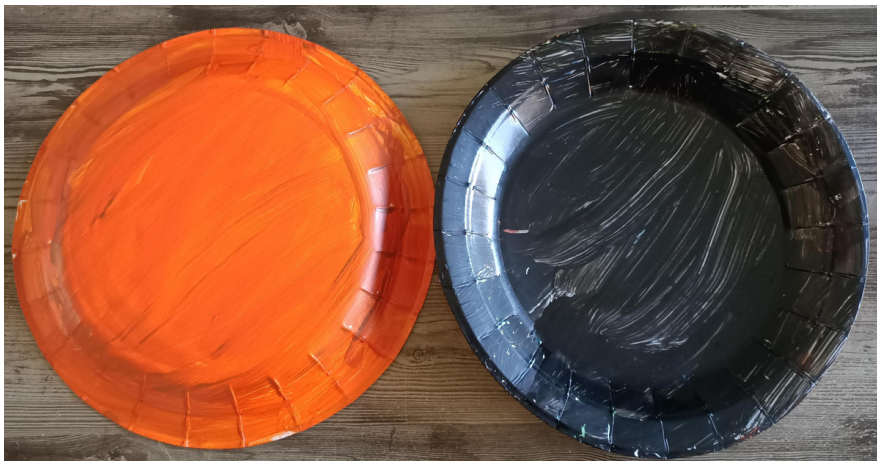

Let's make a jack o'lantern out of paper plates!

What you need:

- 2 paper plates
- Paint and drawing materials
- Sticky tape
- Scissors
- Battery tealight candle

What to do:

1. Paint the inside of the paper plates black and the outside orange. Leave to dry overnight. If you don't have paint, colour the plates in.

2. Draw a face on one of the paper plates, then cut out the eyes and mouth. You might need an adult to help with this part. I carefully poked a hole with the scissors and cut the eyes and mouth out.

3. Cut the bottom of the plate so it is flat. Use sticky tape to attach the plates together around the edges. Make sure the orange side is on the outside. Leave the flat bottom open.

Cut both plates where the red line is so they sit flat.

4. If you have a battery tealight candle, pop that inside the jack o'lantern at night and watch the spooky face glow!

Upload a photo of your jack o'lantern on the [Kids Club Online Gallery](#).
