

# Beaded Wreath

## What you need:

- Pipe cleaners.
- Beads. The hole needs to be big enough to thread the pipe cleaner through.

## What to do:

1. Thread beads onto a pipe cleaner. Leave a bit of space at each end. Repeat with another pipe cleaner.
2. Twist these two pipe cleaners together to make a circle shape and twist the ends together.
3. To make the wreath fuller, try using 4 pipe cleaners twisted together.
4. Hang your wreath up to admire! Take a photo and submit to the [Kids Club Online Gallery](#).
